

Baldwin Boxall Job Vacancy

Development Engineer

Baldwin Boxall is a successful voice alarm and emergency voice communication manufacturer, looking for a firmware/hardware engineer.

The successful candidate will work in the busy R&D Department and should have knowledge/experience in:

- Audio engineering.
- DSP programming (Analog Devices).
- RS232/485 data communication.
- Fibre and Ethernet data communication.
- Class D audio amplifiers and switch mode power supplies.

As an employee, you will be provided with a competitive salary. After six months employment you will be offered membership to the company pension scheme, private health insurance and life assurance.

Baldwin Boxall is a prestigious, forward thinking company renowned for our high quality products.

Please send your CV to:
