Mix with the best in the business – Join us at ISCEx2012

At the most relevant event in the sound industry calendar, you will meet the people that matter most to your business, with informative seminars led by industry experts, running alongside the exhibition.

10.00am

Are modern technologies always appropriate?

Tony Barns MInstSCE
Managing Director, AK Barns Ltd

In an era of convergence of technologies, often a technology is applied to a solution that is not always appropriate. This seminar will address whether the application of certain technologies compromises the integrity and reliability of voice alarm systems.

11.00am

The science and art behind audio localisation

Robin Whittaker
Director, Out Board Electronics Ltd

Audiences find it distracting to see an actor on the right side of the stage, but hear their voice from a loudspeaker on the left. Spread this out across multiple actors and you have an audience stressed by the effort of trying to discern who is saying what. This seminar covers source-oriented reinforcement, effectively giving each performer their own PA system, voice localisation techniques and automation.

2.30pm

Audio over IP – a new solution for old problems?

Eric Bevillard
Global Product Manager, Ateis Europe

The Audio over IP solution can be used in every-day applications, and its ease of use and integration enables a flexible system for a variety of different applications. This seminar will cover how you can fit this powerful solution into your daily projects for PA, intercom, retail and transport, in an efficient and effective way.

3.50pm

The future of live sound – controlling the mix the new way

Martin Daley AMInstSCE
UK Sales Manager, Allen & Heath

Digital is here to stay, and in the case of live festival events to church and theatre sound installations, digital mixing can offer invaluable tools for creativity and control. This seminar will look at how these digital desks can be accessed using laptops, iPads and iPhones and the best ways to get them all talking to one another.

ISCE

The Institute of Sound and Communications Engineers

For the latest list of exhibitors, please visit our website www.isce.org.uk

All seminars will be commercially neutral, although demonstrations may use the speakers' own products
