

**Institute of
Sound and
Communications
Engineers**

**The professional organisation for the
sound and communications industry**

Providing outstanding networking opportunities,
technical support and training

What is the ISCE?

The Institute of Sound and Communications Engineers is the specialist professional body within the sound and communications industry. It was founded in 1948 and is an entirely independent Institute, run by a Council elected by its members.

If you are involved with professional audio, you need to be a member of the ISCE. Membership of our Institute is an endorsement of technical excellence.

PROMOTING TECHNICAL EXCELLENCE

What does the ISCE do?

Public interest

We promote our science and technology and its importance for the general improvement of society.

Knowledge transfer

We offer excellent training through:

- CPD training courses
- technical papers
- online members forum.

ECS card scheme

We offer 'sound engineer' ECS site access cards to our members upon successful completion of the H&S test.

Meetings

We provide a forum for audio professionals to meet both physically and virtually.

Political representation

We represent the audio industry and our membership with the authority of a learned body to influence decision makers at local and national government level.

Standards

We create and uphold national and international standards relevant to our profession.

Ethos

We have high professional and ethical standards and require that our industry is protected and promoted not only by the Institute itself, but by each and every member.

Membership quality

We represent only trained, qualified and experienced practitioners. Membership of our institute is an endorsement of technical excellence.

Code of conduct

Our members agree to abide by our professional code of conduct in their technical work and in their working relationships.

'The ISCE is a reservoir of knowledge and experience that members can tap into, helping our industry to take its rightful place as a mature engineering discipline.'

Benefits of Membership

Why should I join?

You will find us to be a friendly and welcoming institute that has influence within the industry.

You will have:

- the opportunity to learn from the most experienced practitioners in the world
- the chance to be able to exchange ideas and concepts
- an ECS recognised level of technical skill via your membership grade
- the right to quote your designated ISCE grade publicly
- a 'sound engineer' ECS site access card (subject to H&S test)
- access to the following Institute resources included in your annual subscription:
 - all other members and the secretariat
 - technical knowledge and advice
 - ISCE website members pages
 - ISCE magazine
 - Company document templates such as risk assessments, method statements etc
- invitations to technical seminars and other learning opportunities that will count towards your CPD
- access to additional 'pay-as-you-go' resources at discounted rates:
 - seminars
 - workshops
 - ISCEx annual event
 - other institutes and associations: eg IOA, PLASA.

Why should my staff join?

There are many reasons why, but you will have:

- visibly accredited staff that increases client confidence in your business
- Electrical Certification Board site entry permits designating 'sound engineer' for your staff
- confident, well informed staff that will benefit your workflow and profit
- portions of the CPD, either through formal or informal learning, delivered by ISCE
- staff who will appreciate your investment in their career, which will be beneficial to your business in many ways.

How can my company be associated with the ISCE?

We have a Supporting Members Scheme so that companies may also be part of the institute.

Benefits include:

- intrinsic value of being part of a body of excellence
- named on the ISCE website with links
- certificate and plaque for prominent display at your premises
- access to some industry events at reduced rates
- recruitment advertising to a targeted audience.

'ISCE's commitment to raising the standard of sound systems and public address through its education and training programs provides a means for its members to keep up-to-date with developments in audio technology and best practice.'
